

Practice Organs for Sale

Presently we have two of our Practice Organs available for delivery in August, 1996. We built these together with the ones we recently installed at Kwassui University in Nagasaki and at the residence of Ms. June Miller, State College, Pennsylvania. We have built several such batches of our standard practice organ in the past, making improvements each time, lavishing the same care on the building of these small organs as on our larger organs. By building them in multiples, though, we are able to offer them for the very reasonable price of approximately fifty-thousand dollars. This price includes installation, but not shipping outside Eastern Massachusetts. I personally will enjoy doing the on-site tonal finishing.

Fritz Noack

The Stoplist:
